

Graphic specifications for Creators

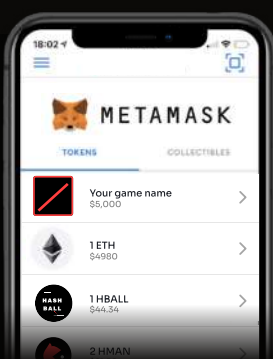

The recommended file format is JPG. The system accepts other formats including images with alpha channel (transparency). We recommend that the linked graphics have the smallest possible file weight.

Our system imports images directly via the link. If the link no longer leads to an image for any reason, the image will be replaced by our default image until the user updates the correct link.

Guidelines

Game Logo

#	Name
542	 Your game name 0x2124...2151 ↗
